

ANDRE ZALDIVAR AGLE

SOFTWARE ENGINEER

PROFILE

I am a software engineering student from the United States studying in the Tec de Monterrey campus Queretaro. I want to gain more experience and work on more complex and bigger web development projects. I learn quickly and love to be useful where I can. My main experience has been in projects geared towards providing customized software solutions to business models. I am most interested in web development and system optimization.

EDUCATION 2022 - NOW

TEC DE MONTERREY

- Software Engineering

LANGUAGES

- English (Native)
- Spanish (Fluent)

EXPERIENCE

Educational Simulator App

MAY 2024 - PRESENT

Web Dev/Scrum Master

- Leader of a subdivision of a student-led project where we are creating a gamified app/simulator of product lines.
- The app is a realistic simulation of production lines geared towards industrial engineering students.
- My group is creating a financial dynamic React app/dashboard compatible with the original simulation and third parties.

Project Risk Manager App (School)

APRIL - JUNE
2024

Web Dev

- I worked alongside a real software company called Appix to create a full stack secure web application for project risk management.
- The app stores project data to generate historical graphs and current indicators to provide insight into the viability of projects and inform the client's business decisions.
- Straightforward usability and easy installation/deployment for client.

React/API Travel Advisor App

FEBRUARY 2024

Web Dev

- Static react application that produces a map of the best restaurants around the user's location.
- Uses geolocation and APIs from Google and RapidAPI to retrieve the restaurant information and create the interactive map.
- <https://travel-advisor-react-app.vercel.app/>

CONST PROGRAMMING = ["Javascript", "Python", "C++", "Git/Github", "React JSX"]
